

The Industrial Accelerator Act

Growing EU Industry, Securing Jobs for the Future

WHY THE INDUSTRIAL ACCELERATOR ACT?

- Strengthen the EU's industrial leadership in strategic sectors
- Preserve and create around 150 000 jobs in key industrial sectors
- Accelerate industrial decarbonisation investments through low-carbon and Made in EU provisions in public schemes and procurement

Ambition to increase the share of manufacturing in EU GDP from 14.3% in 2024 to 20% by 2035

HOW WILL WE DO THAT?

Use public procurement and public incentives to boost demand for EU clean tech industry and products

→ Steel, cement and aluminium, automotive components and net-zero technologies

Ensure foreign investments (>100 million) in batteries, EVs, solar PV, and critical raw materials generate max. added value for the EU economy

→ min. 50% employment of Union workers

→ Conditions related to local content, ownership, knowledge and technology transfer, and R&D activities

One project, one digital procedure to speed up and simplify permitting

→ Single Access Points through European Business Wallet

→ "One project-one submission", single permit-granting procedure

Create Industrial Acceleration Areas with streamlined permitting (area-wide permit and tacit approval) to promote new investments and facilitate decarbonisation

→ Greater certainty for investors
