Subject: Flex-N-Gate Automotive Manufacturing

Hello,

Thank you for taking the time to speak to me today.

To provide a brief background for you, Flex-N-Gate is an automotive supplier with 54 facilities worldwide and 17,000 employees. We are a tier I supplier to almost all automotive manufacturers, supplying various components such as bumpers, lighting assemblies, hinges, and jacks. I will send a more detailed presentation of our company overview to you shortly.

For the components listed above, we purchase many commodities to support the assembly and production of these products (see presentation sent). As Poland is an automotive leader in central/eastern Europe, we would like to explore the opportunity to find suppliers of these commodities to support our business.

Please forward me any information regarding the Polish automotive industry that you believe will be helpful, as well as any applicable contact information. Please do not hesitate to contact me if you have any questions.

Thank you,

Brady Hicks
Buyer, Advance Purchasing
